Bimalendu Behera

Systems modernisation expert

Bhubaneswar, Odisha, India

Summary

Skilled in performing code reviews, evaluating technical debt and implementing scalable, clean code (Solid, yagni, Dry) to transform legacy monolithic codebases into resilient, modern architectures. Introduce AI and agentic workflows to improve user experience of existing or new apps. Expert at leading international stakeholders through complex migrations including containerisation, container orchestration, distributed messaging and security refactoring. Worked with cross functional teams to get things done. Proficient in cloud environments like AWS, GCP and Azure to take advantage of multi-cloud strategy and avoid vendor lock-ins.

Experience

Ocean Technologies Group

Back End Developer

March 2023 - January 2026 (2 years 11 months)

Worked on legacy english language assessment platform for sea farers, Marlins. Responsible for maintenance and jira ticket based tuning of the php application.
